Little Parts. Big Difference..

Fastening Products Group

Fasteners and Polygiene ViralOff®
together overcome
a challenge in YKK factories

99 % REDUCTION OF
VIRUSES IN 2 HOURS

ISO18184:2019 (SARS-CoV-2, H3N2, H1N1)

ViralOff

POLYGIENE TECHNOLOGY

Polygiene ViralOff®, an antiviral treatment added to textiles to protect the treated article itself from contamination, gives 99% reduction of viruses in 2 hours*. It is not intended to cure or prevent diseases. Polygiene ViralOff® doesn't interfere with the skin's natural bacterial flora. The chemical components are eco-sustainable and ViralOff® encourages a reduction in the frequency of washing of the garments, prolonging their life cycle and the consumption of energy, water and chemical additives.

*ISO18184:2019 (SARS-CoV-2, H3N2, H1N1)

Metal		•	•	•		

Natulon® (Recycled Polyester) and PS (Polyester Spun) tapes are also available.

Please note: only the textile part of our items can be treated with ViralOff® by Polygiene®: the tape for the metal and the injected plastic zippers, the tape and the coil for the coil zippers. We suggest to use metal finishes for the metal parts for their natural antiviral property.
