W-Arm Buckle

Fastening Products Group

W-Arm Buckle series

As our customer, you are promised by YKK quality, inventiveness, and agility. We pledge to continue to satisfy our customers' needs with service and products that embody our effort and loyalty to society. In order to do so, we take it as our fundamental responsibility to provide better product quality and more ease of use. Now, YKK proudly introduces our new "W-Arms Buckle" series which combines strength and a lightweight design. This combination allows a wide range of outdoor uses, enhancing your life in various activities. In addition, the "W-Arms Buckle" series is appealing in its sharp and sophisticated look, as well as in its comfortable lock that further differentiates this product.

FEATURES

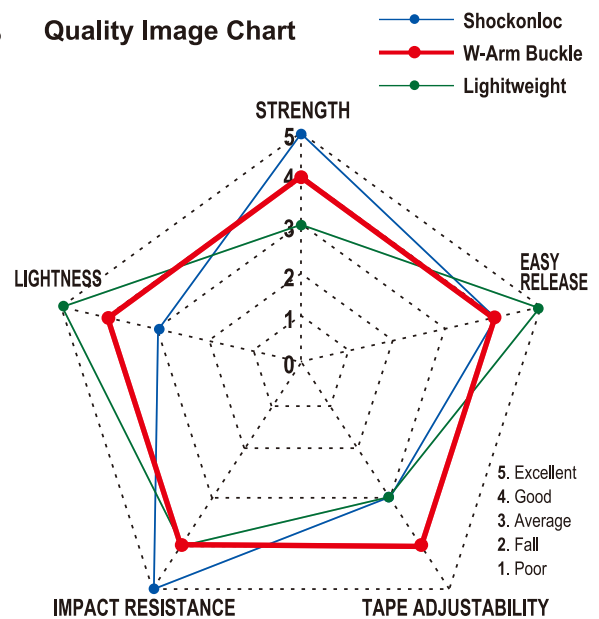

1. A steep angle enables a tight lock and smooth tape adjustment with a simple motion.
2. The "W-Arm" reinforcement prevents the plug legs from breaking.
3. YKK's own "Vertical Engagement System" improves the tensile strength.
4. Perfect insertion removes clearance problems.
